

# CSS *Selectors*

The diagram illustrates the components of a CSS declaration: `a { background-color: yellow; }`. Labels and arrows identify the parts:   
- **selector**: points to `a` with a bracket above it.   
- **property**: points to `background-color` with a blue bracket above it.   
- **value**: points to `yellow` with a green bracket above it.   
- **declaration end**: points to the closing curly brace `}` with a downward arrow.   
- **declaration start**: points to the opening curly brace `{` with an upward arrow.   
- **property/value separator**: points to the colon `:` with an upward arrow.   
- **declaration separator**: points to the semicolon `;` with an upward arrow.

```
a { background-color: yellow; }
```
